Why AI Education Is Critical for Students Today

A sharper, print-friendly version of the original school-facing message

Artificial Intelligence is no longer a future concept — it is the present reality reshaping every career, every industry, and every opportunity. Students who start learning AI early hold an irreplaceable advantage.

World is Shifting Fast

AI and automation are transforming Finance, Healthcare, IT, Marketing, and every major sector globally.

Students at Risk

Students without AI knowledge risk being left behind in the evolving job market. Act now, not later.

Future Jobs Demand It

Tomorrow's careers demand AI plus domain knowledge together. Both are becoming non-negotiable for success.

"AI will not replace humans — but humans using AI will replace those who don't."

— The core philosophy behind YesDo Edutech

ABOUT US

Who We Are

YesDo Edutech is a dedicated AI & Industry Skills Training platform — making students future-ready and employable through practical, real-world learning experiences.

Courses by Industry Experts

Curriculum designed and taught by professionals from leading tech companies and academic institutions.

100% Online & Flexible

Fits seamlessly into any school schedule. Works on any device — no special hardware required.

Affordable with EMI Options

Premium quality education at a fraction of market price — with easy EMI to support every family.

Project-Based Learning

Students build real AI apps, dashboards, chatbots, and portfolios — not just theory knowledge.

AI Mastery Complete Course

Our signature 27-module programme for students

SQL Fundamentals · Python Basics · Power BI (Microsoft) · Excel (Microsoft) · Alteryx Foundation Certification Prep · Chat GPT Prompt sheet · And Many More

All Programmes We Offer

Industry-aligned pathways beyond the flagship

Beyond the flagship, YesDo Edutech offers a suite of specialised courses — each designed to give students a strong, verifiable competitive edge.

Learn AI using Python

[Python](#) · [Machine Learning](#) · [Deep Learning](#) · [NLP](#) · [Computer Vision](#)

Full Python programming through NumPy, Pandas, Matplotlib, and Seaborn, followed by machine learning, neural networks, NLP, computer vision, and real-world AI projects with a deployed model portfolio.

Data Analytics + Business Analytics

[Excel](#) · [SQL](#) · [Python](#) · [Power BI](#) · [Business KPIs](#)

A 7-module curriculum covering descriptive to prescriptive analytics, business foundations, Excel dashboards, SQL querying, Python for data, statistics, Power BI visualisations, and a business analytics capstone.

Python Full Stack Development

[Python](#) · [Django / Flask](#) · [HTML/CSS](#) · [JavaScript](#) · [REST APIs](#)

From Python basics to complete web applications. Covers front-end, back-end, databases, APIs, and real-world projects for students interested in software engineering and product development.

Microsoft Certification Path

[PL-900 Fundamentals](#) · [PL-300 Power BI](#) · [Azure AI](#) · [Power Platform](#)

Official Microsoft certification preparation. PL-900 covers AI, Power Platform, and cloud fundamentals. PL-300 is a deep dive into Power BI, DAX, modelling, and professional dashboards.

Alteryx Foundation & Core Certification

[Alteryx](#) · [Data Prep](#) · [ETL](#) · [Analytics Automation](#)

Industry-recognised certification for data preparation and analytics automation. Highly valued in BFSI and consulting sectors, and a strong differentiator even before graduation.

OUR DIFFERENTIATORS

What Makes YesDo Edutech Unique

Career readiness, practical outputs, and future-focused delivery

We don't just teach tools — we build career-ready problem solvers. Here's what sets YesDo Edutech apart from conventional school-facing ed-tech programmes.

AI Career Toolkit

Resume building, interview preparation, and LinkedIn optimisation — all powered by AI. Students graduate with a professional digital identity.

Build Your Own AI

Students build AI agents, AI employees, and full websites within a single day-sized sprint. This becomes the most memorable part of the programme.

Voice AI & RAG Systems

Students work with Make, n8n, Voice AI, MCP, and RAG-based customer agents — capabilities that many working adults have not yet learned.

Earn While You Learn

The “Make Money Using AI” module teaches students to monetise their skills through freelancing, automation services, and digital products.

Why Partner with YesDo Edutech?

Zero infrastructure, expert delivery, and strong student outcomes

We make it effortless for schools to offer world-class AI education without any additional investment, infrastructure, or faculty. Zero friction, maximum impact for your students.

No Infrastructure Needed

100% online. Works on any laptop, tablet, or smartphone. No labs, no servers, no installation required.

No Additional Faculty

Our expert instructors handle live sessions, recordings, Q&A; support, and assessments end to end.

Boost School Reputation

Align your institution with future-skills education and position your school as a forward-looking leader in Kolkata.

Scalable & Flexible

Easy integration into any academic schedule — after-school hours, weekends, or holiday batches.

FLAGSHIP PROGRAMME FEE

Rs. 10,000 + GST

Market rate: Rs. 30,000 – Rs. 1,00,000+

Save up to 70% vs competitors

Easy EMI options available · Complete 27-module AI Mastery Course · Certification included

Let's Build the Future Together

We are actively reaching out to schools / colleges in Kolkata for our first cohort. This is a limited partnership opportunity — early partner schools / colleges get priority scheduling and special introductory rates. Reach out today to explore how YesDo Edutech can transform your students' futures.
